ont, W. Va., becoming the head of navigation on the Monongahela river for the Pittsburgh, Brownsville and Geneva packet line, said that he did not think his line would run boats through to that point when the contemplated slack-water improvement is completed.

It is also his opinion that little coal will be shipped by river from that point for at least years to come, Coal, he says, can be shipped to Wheeling says, can be shipped cheaper by rail and loaded in barge for shipment south, for the reason that the distance from Fairmont, to Wheeling is not as great as from Fairmont to Pittsburgh, and then, be says, boats get to Wheeling they are over the worst part of the Ohio river. He says that in time the Morgantown line may run a packet from Morgantown to Fairmont, making connections fo Pittsburgh at the former place.
